

Kindergarten Clubhouse Newsletter - - - - -February 2012

New This Month!

This month we will be learning more about the solar system. We will begin to name planets and gain a better understanding of their orbit patterns. We will be making our own planets and hanging them near our solar system ceiling! Once we master the planets we will travel to our planet and better learn what makes Earth unique. We will investigate water, air and land. New work will be added to our Science Center as the month progresses to allow the students to explore these substances in greater detail. Our continent work will also begin this month. We will explore all the continents with our senses watching videos, hearing music, tasting food, and discovering the unique people which live there. If you and your family have ties to a continent and could bring some items to share it would be fantastic! Neat items would be currency, pictures and stories which tell a history of the land and the people which live there. If you let us know your child's heritage we will make sure to touch on the places their families came from and add them to our family heritage map!

Holidays Ahead!

February is Black History month and American Heart Month!

February 2nd is Ground Hog Day!

February 14th is Valentine's Day! (...And our class party will be on this day! Watch for a sign-up sheet!)

February 20th is President's Day!

February 21st is Mardi Gras!

February 29th is Leap Year!

(February is also Mid-Winter Break for the schools. All students will be at Northlake February 20th - 24th! Details to come on fun events and field trips being planned for this week!)
