

Ms. Sara Lennerblom

I am honored to be among the great teachers at Northlake Montessori. My involvement with Northlake Montessori started when this school began in 2005, when I was the busy parent working long hours looking for great childcare! My husband, Mike, and I live in Kenmore with our three beautiful girls ages 7, 5, and 8 months! I have studied early childhood curriculum development at Shoreline Community college and as a teacher now, I look forward to working with you and your child in reaching his or her full potential. Your child will have many wonderful experiences and opportunities to learn and grow in our classroom. My job, as a teacher is to provide a warm environment where children can explore, experiment, create and learn through developmentally appropriate hands-on experiences. I believe very strongly that all children can achieve success if given the right tools and adequate support. I help children focus on their strengths while providing encouragement to guide them to move towards improving their challenge areas. Possessing a love of both learning and teaching, I work very hard to motivate students to enjoy school and to strive to do their best. Best of all, I enjoy watching the children grow and change, challenging them to be independent thinkers, and the hugs and smiles are great too! In addition, I do strive to develop and maintain open communication with you, the parents, throughout the year.

Ms. Rahmane Kandzic

Hello, my name is Rahmane Kandzic, and I have been in the US for four years. I came from the small country of Bosnia and Herzegovina and am living with my husband, Ismet. Currently, as a student at North Seattle Community College I am earning my Early Childhood Education AA Degree. I love to work with children as each child is unique. Children are so precious and they need our love and care.

Mission For Our Class:

The students in Pre-K 2 will work responsibly, individually and cooperatively to learn the skills they will need to be successful in the classroom and in life.
