

Hello I'm Mrs. Lauren. I would like to take a moment of your time to introduce myself as I am going to be assisting in the Kindergarten Classroom this school year. (Which I am so thrilled to do!)

I am happily married, eight years and counting, with two little ladies ages two and four. My daughters Addaline and Maylee are the light of my life. It is funny how kids make your life so full you often wonder what you did with your time before they came. My family and I live in Gold Bar... which for those of you who are saying "where is Gold Bar?"... Well it is at the base of the Cascade mountains on highway two. A lot of people often wonder why I would commute so far but the tradeoff for a long drive to and from work is living in the most scenic town where we fill our spare time with the never ending list of home improvement projects and exploring the mountains, forest and rivers making up the amazing valley we call home. Finding such an amazing place to work was a chance happening for me, especially since it was further out than I was originally willing to search, but stepping foot into this center and meeting the staff and children I knew this is where I belonged. I have set roots down here and have been happy in my work since 2008. I have a long history in working in childcare which has taught me so much, as well as helped me acquire much needed skills, training and certificates. I have a deep passion for working with kids and enjoy the challenges and rewards it offers daily. Nothing makes me happier than to see a child who thought they could not achieve a task succeed. The look on their face makes all the effort put forth into teaching worth it! I look forward to this school year, we have lots of fun and exciting activities planned! So if you see me around and want to introduce yourself please do, I love meeting the parents and caregivers of the children. I am honored to work with!
